

WORLD EXPO 2025

**The future is not designed,  
yet composed**

The next world exhibition 'Expo 2025' will take place in Osaka from 13 April to 13 October 2025. BWM Designers & Architects, together with facts and fiction, have won the two-stage realisation competition for the design of the Austrian pavilion. The motto of the Expo - 'Designing future societies for our lives' - will be interpreted musically: In Austria, the future is not 'designed', here it is composed - 'Austria. Composing the Future'. The sculptural band of sheet music and the prominently placed title make it clear from a distance: this is about Austria. And about music.
